MINECOFIN

Kigali, Rwanda

CATEGORY	Conference
LOCALE	Kigali, Rwanda
CLIENT	MINECOFIN
LCA SCOPE	Conference
STATUS	Completed

Project Summary: Supply and Installation of Shure Microflex Conferencing System – Rwanda Ministry of Finance
We successfully supplied and installed the Shure Microflex Conferencing System at the Ministry of Finance in Rwanda. This project involved delivering a state-of-the-art audio-conferencing solution to enhance communication efficiency during meetings and conferences. Our scope of work included system procurement, installation, configuration, and user training to ensure seamless operation. The installation has significantly improved audio clarity, meeting management, and overall collaboration within the ministry.

Core Components installed

- 1. Microflex Complete (MXC) Conference Units (20x) – Individual delegate and chairman units with built-in microphones and speakers.*
- 2. Gooseneck Microphones (20x) – High-quality Shure MXC-series gooseneck microphones for clear audio pickup.*
- 3. Central Control Unit (CCU) (1x) – The processor that manages the entire conference system, controls microphone activation, and integrates with external systems.*
- 4. Networked Audio Interface (if required) – For integrating with an external audio or recording system.*
- 5. Wireless Access Point (MXCWAP) – If using the wireless Microflex Complete Wireless (MXCW) system.*
- 6. Software and control interface & Integration system with video.*

INTARE KIVU ARENA RUBAVU

CATEGORY	HALL
LOCALE	GISENYI, RWANDA
CLIENT	RPF RUBAVU
LCA SCOPE	Acoustic, Audio Visual, Lighting
STATUS	Completed

Acoustic and Sound System Design – Intare Kivu Arena, Rubavu
We successfully executed the acoustic and sound system design for Intare Kivu Arena in Rubavu, ensuring an optimized audio experience for various events.

Acoustic Design
Our design focused on enhancing sound clarity and minimizing echo through:

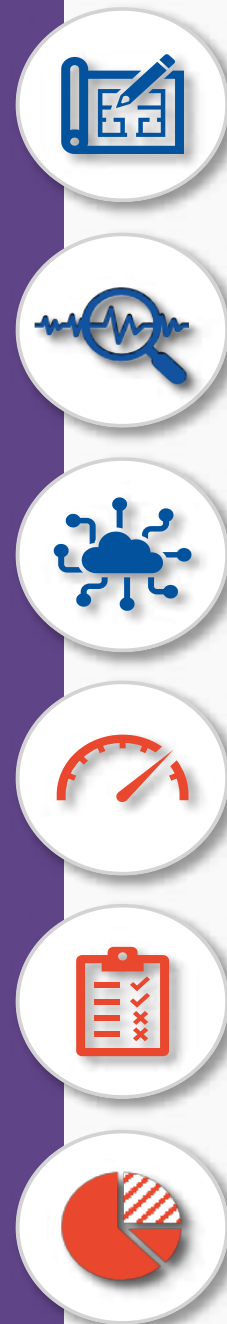

- Floor Treatment: Installation of acoustic carpets to reduce sound reflection and improve absorption.
- Wall Treatment: Application of high-end slitted panels and fabric panels for sound diffusion and control.
- Ceiling Treatment: Installation of acoustic ceiling panels to manage reverberation and ensure balanced acoustics.

Sound System Design
To complement the acoustic treatment, we proposed a high-performance sound

system, featuring:

- dB Technologies Mini Line Array and S30 sub – Ensuring powerful, clear, and even sound coverage across the arena.
- Yamaha TF5 Digital Mixer – Providing advanced mixing capabilities, user-friendly controls, and high-quality sound processing.

The integration of these solutions significantly enhances speech intelligibility, music performance, and overall audio experience within the venue.

NTARE SCHOOL LOUISENLAND SCHOOL:

CATEGORY	Theatre
LOCALE	Rwanda
CLIENT	Ntare School Louisenland School
LCA SCOPE	Acoustic, Visual
STATUS	Completed

Acoustic Wall Treatment & Public Address System – Ntare Louisenland School Multipurpose Hall

We successfully designed and installed acoustic wall treatment and a public address (PA) system for the Multipurpose Hall at Ntare Louisenland School, ensuring excellent sound quality for various events, including assemblies, presentations, and performances.

- Acoustic Wall Treatment
- To enhance speech intelligibility and minimize echo, we implemented:
- High-Quality Acoustic Wall Panels – Installed to absorb excess sound reflections and improve clarity.
 - Fabric-Wrapped Panels – Designed for both aesthetics and optimal sound absorption.
 - Strategic Panel Placement – Optimized to create balanced acoustics throughout the hall.

- Public Address (PA) System
- To provide clear and even sound coverage, we installed a high-performance PA system featuring:
- Digital Mixer – A user-friendly digital console for precise audio control and customization.
 - dB Technologies Active Speakers – High-powered self-amplified speakers for reliable and clear sound distribution.
 - Wireless & Wired Microphones – Offering flexibility for speakers, presenters, and performers.
 - Signal Processing & Optimization – Configured to ensure even sound coverage without distortion.

Key Benefits

- Improved sound clarity for speeches and presentations.
- Reduced echo and unwanted noise due to effective acoustic treatment.
- Enhanced ease of use with a modern digital mixing console.
- Balanced sound distribution across the entire hall.

This installation has transformed the multipurpose hall into a well-equipped venue suitable for various school functions, ensuring a professional-grade audio experience.

Christian Life Assembly church

CATEGORY	House of wor-ship
LOCALE	Rwanda
CLIENT	Christian Life Assembly church
LCA SCOPE	Audio & Lighting Solutions
STATUS	Completed

Sound System & Stage Lighting Design – Christian Life Assembly
We successfully designed a state-of-the-art sound system and stage lighting setup for Christian Life Assembly, ensuring high-quality audio and an immersive worship experience.

Sound System Design

To achieve clear, balanced, and powerful audio, we implemented:

- **Main Speakers:** dB Technologies K5 (Line Array System) – Ensuring even sound distribution across the worship space.
- **Subwoofers:** dB Technologies KS20 – Providing deep, impactful low-frequency reinforcement.
- **Stage Monitors:** dB Technologies FM15 – Delivering precise monitoring for musicians and vocalists.
- **Digital Mixer:** Allen & Heath SQ7 – A powerful, user-friendly console with advanced mixing capabilities and excellent sound processing.

Stage Lighting Design

To enhance the worship atmosphere and stage presence, we integrated:

- **Chauvet Stage Lighting System** – A professional lighting setup for dynamic worship services and events.
- **Moving Heads, LED Wash Lights, and Spotlights** – Ensuring flexible lighting control for various moods and occasions.

Key Benefits

- Clear and immersive sound experience for worship services.
- Well-balanced audio coverage with professional-grade line array and subwoofers.
- Enhanced stage visibility and ambiance through Chauvet lighting.
- Easy operation and flexible control with the SQ7 digital mixer.

This setup ensures powerful and engaging worship experiences, meeting the technical and spiritual needs of the congregation.

Atelier Du Vin

CATEGORY	Bar, Restaurant, Clubs
LOCALE	Rwanda
CLIENT	Atelier Du Vin
LCA SCOPE	Audio Visual Solutions
STATUS	Completed

Sound System – Atelier du Vin

We implemented a high-performance setup to enhance ambiance and ensure premium sound quality throughout the venue.

System Components

dB Technologies Opera 15 & Opera 10 – Powerful, clear sound with wide coverage.
dB Technologies Sub 615 & Yamaha DXS 18 – Deep, dynamic bass for a rich listening experience.
Yamaha MG16XU Mixer – Precise sound control and high- quality audio processing.

Key Benefits

- Immersive Atmosphere – Optimized sound enhances guest experience.
- Clear & Balanced Audio – Perfect for background music and live performances.
- Versatile Control – Seamless adjustments for different events.

This system elevates clarity, live performances, and the overall audio experience at Atelier du Vin.
